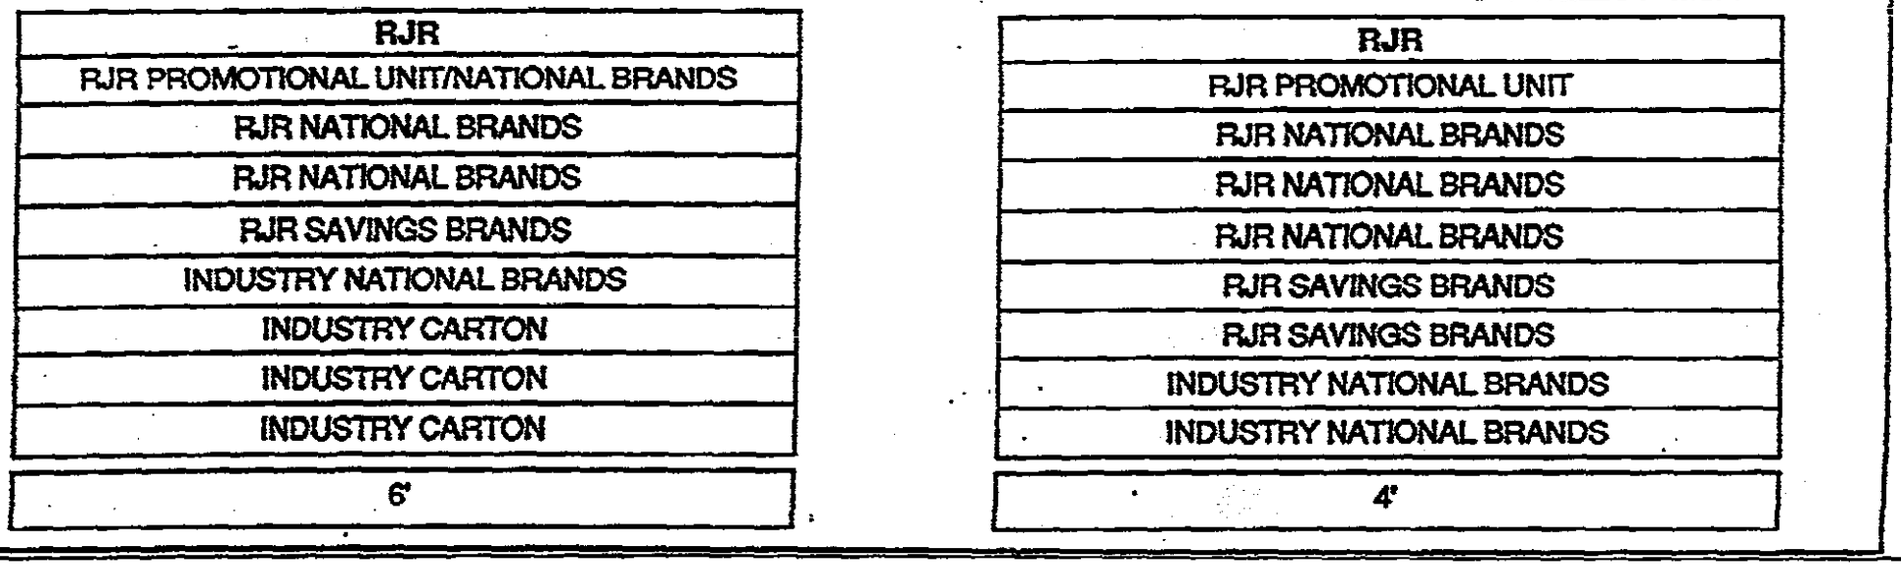
---CLEARANCE SPECIFICATIONS---



A) 12.5" between shelf top and underside of SupeRx gondola valance or to top of gondola section if store has no valance

B) 6 1/8" between shelves

C) 4 high carton shelf

D) 3 high carton shelf

** When spacing shelves, work from top to bottom. Measure clearances on Philip Morris set against above specifications. If okay, match up with PM shelves and proceed with reset. If PM set doesn't conform to specifications: Determine whether or not this variance will detract from the appearance of the RJR signage. Keep in mind that these clearance standards were established to ensure that SupeRx would have a co-existing cigarette department with a very compatible appearance. Signage must line up, RJR signage must be totally visible, RJR promotional platform space must be adequate, and all shelving should line up. If variance poses no disadvantage to RJR, proceed with reset. If variance does put us at a disadvantage, set RJR side to specifications and notify SCAM R. L. Amazon through your Division office.
